

Flavor Burst[®] FCB System

THE 8-FLAVOR FACTORY

Flavor Burst's 8-flavor injection system is now available for frozen carbonated beverage freezers! The FB 80FCB works with your freezer to inject the product with up to 8 different flavors in single or multi-flavored servings! With over 30 unique flavors such as Peach Twist, Classic Cherry, Green Apple, & Blue Raspberry, Flavor Burst[®] allows you to multiply your menu options.

SIMPLY SELECT & SERVE

It doesn't get easier than this: select a flavor or combine multiple flavors using the keypad and draw a serving. The system blends in the flavors as the product is dispensed for a truly colorful and tasty treat!

COMPACT & COMPATIBLE

The FB 80FCB system works with your existing freezer as an easy-to-install add-on. The cabinet stores the 8 flavor bags, and the keypad allows for easy selection of one or more flavors per serving. With a variety of adapter kits available, FB 80FCB is compatible with most Taylor[®] freezer models.

SO WHY WAIT?

Visit our website or contact your local distributor for more information on our great systems. Flavor Burst[®] could be the key ingredient in your formula for success!

Flavor Burst® FCB System

FROZEN CARBONATED BEVERAGES

Flavor Burst® puts flavor first. Flavorings are packaged in triple-layer bags for long, stable shelf life that requires no refrigeration. One gallon of flavoring yields an average of 240 finished 16 oz. servings! New flavors are simple to insert and lock into place - choose from a variety of available flavors that will attract both adults and kids alike!

The FB 80FCB system is easy to install and operate. Simply select the flavor of choice on the electronic keypad and draw a serving using the freezer draw handle. Concentrated flavorings are injected throughout the product as it is dispensed. Flavor output is adjustable for both flow and taste. Each system is built with easy-to-wipe-clean, all stainless steel cabinetry. With both clean and sanitize-in-place functions, cleaning requires only a few minutes a day.

Also available is an Auto Draw Valve system for self-serve operations. The FB 80FCB AUTO system replaces the draw-handle dispensing operation with a simple push button operation. Serving sizes can be preset using the keypad for consistent proportions. It is even programmed to top off the serving so that flavor is cleared from the spout for the next serving. This is an ideal system for C-stores and other businesses where customers draw their own servings.

Expand any menu with sensational flavors using the smallest space possible with an innovative Flavor Burst® system!
